

COLOURTEC POWER SUPPLY Power for 4 scrollers.

Housed in a tough 2 mm Aluminium enclosure, this power supply can supply the required 24 volts to suit four scrollers. The input link is DMX buffered which presents only one load to the DMX network regardless of the number of scrollers on the output of the power supply. The power supply circuitry is of transformer and rectifier type which enables it to run even when there are large variances in the incoming mains power. Input connectors are professional 5 pin XLR type and output is 4 pin XLR type. This power supply is supplied with a large threaded stud to enable a bar hook to be fitted for flying the supply together with the scrollers. The 240v inlet cable is securely attached to the box via a high compression metal gland. Four screwed rubber feet keep the unit stable and above any other equipment air vents or such like.

SPECIFICATION

Weight: 4 Kg
Size :230w x 270 x 65mm
Finish: Powdercoat Texture
Input: 240v
Output: 24 Volt DC
Output Fuse: 4A
Input Link: M to F Hardwired
Input: 5 pin XLR
Conformity: DMX512 USITT
Output: 1 x 4 Pin XLR
Pin1: Shield
Pin2: Data
Pin3 Data +
Pin4: 24Vdc
